

Affidavit of Mary Lee Jensvold sworn to November 21, 2013

STATE OF NEW YORK
SUPREME COURT COUNTY OF NIAGARA

In the Matter of a Proceeding under Article 70
of the CPLR for a Writ of Habeas Corpus,
THE NONHUMAN RIGHTS PROJECT,
INC., on behalf of KIKO,
Petitioners,
v.
CARMEN PRESTI, individually and as an
officer and director of The Primate Sanctuary,
Inc., CHRISTIE E. PRESTI, individually and as
an officer and director of The Primate Sanctuary,
Inc., and THE PRIMATE SANCTUARY, INC.,
Respondents.

AFFIDAVIT OF
MARY LEE JENSVOLD

Index No.:

STATE OF WASHINGTON)
) ss:
COUNTY OF KITTITAS)

Mary Lee Jensvold being duly sworn, deposes and says:

Introduction and Qualifications

- 1. My name is Mary Lee Jensvold. I reside and work in Ellensburg, Washington. I hold a Ph.D. in Experimental Psychology from the University of Nevada, Reno, which I received in 1996.
2. I submit this affidavit in support of Petitioners The Nonhuman Rights Project, Inc. ("NhRP"), on behalf of Kiko, for a writ of habeas corpus. I am a non-party to this proceeding.
3. I am currently Associate Professor in the Department of Anthropology and Museum Studies and former Director of the Chimpanzee and Human Communication Institute at Central Washington University. I am also faculty in Primate Behavior and Ecology Program, at Central Washington University. I have taught the following courses at Central Washington

University: Primate Social Behavior, Chimpanzee Culture and Communication, Introduction to Primate Laboratory Experience, Laboratory Work in Primatology, Primate Culture and Cognition, Introduction to Psychology, Psychology of Thought and Language, and Nonverbal Behavior, among others.

4. I have been a member of the Board of Directors of the Animal Welfare Institute since 2007 and Friends of Washoe (a nonprofit organization dedicated to the welfare of chimpanzees) since 1999, and have been on the Advisory Board of the Fauna Foundation (a chimpanzee sanctuary in Quebec, Canada) since 1999. From 1997 – 2000 I served on the Scientific Advisory Board for the National Chimpanzee Sanctuary. I have held positions as a chimpanzee behaviour consultant at Fauna Foundation, a Principal Investigator for “Caring for Chimpanzees” Earthwatch Program at Central Washington University, and have been a research assistant for sign language studies of chimpanzees at the University of Nevada, Reno. I was recently awarded the Sigma Xi Distinguished Lecturer Award for 2013 – 2015.

5. My research specialization is in gestural communication and use of American Sign Language in chimpanzees. Additionally, I research play behaviour, imagination, culture and intelligence, as well as husbandry, welfare and environmental enrichment in captive chimpanzees. I have over twenty-seven years of experience working with and studying chimpanzees and daily firsthand experience interacting with them. As such, I possess both a theoretical and applied understanding of chimpanzee behaviour.

6. I have published 29 peer-reviewed articles, book chapters and encyclopedia entries on gestural communication, use of American Sign Language, the evolution of social communication, as well as environmental enrichment, effects of enclosures and social interactions, in chimpanzees. My papers have appeared in some of the most prestigious journals

in the area of animal behaviour, including *Animal Cognition*, *American Journal of Primatology*, *Journal of Applied Animal Welfare Science*, *Human Evolution*, and *Journal of Sociolinguistics*.

7. I have given 91 presentations at professional conferences throughout the United States and have also given 13 invited addresses at professional research conferences and at various universities throughout the United States. These presentations have covered the following relevant topics: gestures and signing, cultural transmission, laughter and play, vocabulary development (American Sign Language), conversational use of sign language, evaluation of enriched captive environments and neuroscientific models of continuity across ape and human communication systems. My Curriculum Vitae fully sets forth my educational background and experience and is annexed hereto as “**Exhibit A**”.

Basis for Opinions

8. The opinions I state in this Affidavit are based on my professional knowledge, education, training, and 27 years of research with chimpanzees, as well as my review of peer-reviewed literature about primatology published in the world’s most respected journals, periodicals and books that are generally accepted as authoritative in the field of primatology, many of which were written by myself and colleagues with whom I have worked for many years and whose research and field work I am personally familiar with. A full reference list of peer-reviewed literature cited herein is annexed hereto as “**Exhibit B**”.

Opinions

9. Chimpanzees who have acquired comprehension and production of American Sign Language (ASL) provide a unique window into the minds of chimpanzees because ASL provides a way for them to express themselves in a manner that humans understand well. The chimpanzees I have worked with have demonstrated purposeful communication, conversation,

understanding of symbols, perspective-taking, imagination, and humor through my (and my colleagues') studies of their use of ASL over many years (Davila-Ross et al., 2009; Jensvold and Fouts, 1993; Jensvold and Gardner, 2000, 2007; Leitten et al., 2012). Moreover, the development of their use and understanding of sign language, along with their natural communicative gestures and vocalizations, parallels the development of language in human children, pointing to deep similarities in the cognitive processes that underlie communication in chimpanzees and humans (Jensvold, 2009; Lyn et al., 2011).

10. Studies of cross-fostered chimpanzees, that is, those who have been raised by humans and acquired a symbol-based language, reveal similar patterns of cognitive and communicative development in human infants and chimpanzees. There are numerous parallels in the way chimpanzee and human communication skills develop over time, suggesting a similar unfolding cognitive process across the two species and an underlying neurobiological continuity (Fouts and Waters, 2001). Chimpanzees show some of the same early developmental tendencies and changes in their communication skills as human children (Brakke and Savage-Rumbaugh, 1995; Fouts and Fouts, 2004; Gardner and Gardner, 1989; 1998). For instance, chimpanzees acquire vocabulary in patterns that resemble human children, with the difference being that the chimpanzees begin to sign earlier than children (Gardner & Gardner, 1994). The development of phrases in chimpanzees also parallels that in human children. Early vocabulary content of the chimpanzees' resembles that of human children as well. Patterns of eye gaze and turn taking (Hartmann, 2011) in conversation resemble human children as well. Chimpanzees modulate their signs, for example, changing the place where a sign occurs, to change the meaning of signs, just as humans do (Charlcraft & Gardner, 2005). Declaratives are important because they show the communicator is using language as a way to share experience with another and not just

request items like food or a toy both human children and signing and other symbol using chimpanzees use declaratives to name objects, to interact, and to negotiate (Lyn et al., 2011; Leeds and Jensvold, In press). They also use symbols to comment on other individuals and about past and future events (Lyn et al., 2011). The ability to communicate about past and future events is based on the shared sophisticated cognitive capacity for “mental time travel” for which there is substantial evidence in chimpanzees (Osvath and Osvath, 2008). In fact, chimpanzees have been found to make more statements about what they intended to do in the future compared with human children (Lyn et al., 2011). Chimpanzees and human children also combine gestures with pointing to refer to objects (Krause and Fouts, 1997). Therefore, these findings show that chimpanzees can make declarative statements and, thus, use language in a similar purposeful way as human children do (Lyn et al., 2011; Leeds and Jensvold, in press).

11. Purposeful communication is based on conversational interaction in which each of the participants exchanges turns communicating in a give-and-take manner and participants respond appropriately to the communicative actions of each other. Moreover, when the conversation becomes confusing, participants make contingent adjustments, e.g. offering a revised or alternative utterance/gesture or repeating a gesture or “sign” in order to continue the conversation. Signing chimpanzees demonstrate contingent communication with humans at the same level as young human children (Leitten et al., 2012). When humans feel that a conversation has broken down they repeat their utterance and also add more information to the original utterance. Likewise, chimpanzees engaged in sign language conversation with humans respond in the same way. When they make a request and it is satisfied, they cease signing their request. When the request is misunderstood, refused or not acknowledged, they repeat and revise their signing until they get a satisfactory response. As in humans, this pattern of

contingency in conversation is a key demonstration of volitional and purposeful communication and thought (Leavens et al., 2005; Leitten et al., 2012). In one of our studies, a human waited for a signing chimpanzee to initiate a conversation and responded in one of four ways: asking for more information, on-topic questions, off-topic questions, or negative statements. The rejoinders of the chimpanzees depended upon the kind of response they received from the human. Specifically, they reiterated, adjusted, and shifted the signs they were making to create conversationally appropriate rejoinders. For instance, if refused something by the human some of them persisted in their utterances while others shifted to another topic. Their reactions to and interactions with a conversational partner resembled patterns of conversation found in similar studies of human children (Jensvold and Gardner, 2000, 2007). In other studies, chimpanzees have demonstrated the capacity to understand that conversation involves turn-taking and mutual attention. If they wish to communicate with a human whose back is turned to them they will make attention-getting sounds, i.e. using only signs with a noisy sound component, such as smacking the hand. If the human is turned to them, they then switch to conversational sign language with few sounds (Bodamer and Gardner, 2002). Therefore, they intentionally try to alter the attentional state of the human. Not only do chimpanzees engage in conversation when signing but both wild and captive chimpanzees string together multiple gestures to create gesture sequences (Campion et al., 2011; Hobaiter and Byrne, 2011; McCarthy et al., 2013). Gestures may be combined into long series, within which gestures may overlap, be interspersed with bouts of response waiting or be exchanged back and forth between individuals. Here, too, their contingent use of gestural sequences demonstrates that their communication abilities are far more complex than simple calls based on stimulus and response. Chimpanzees adjust their gestures and gestural sequences to the attention state of the individual they are trying to communicate

with, using visual gestures towards an attentive partner and tactile and auditory gestures more often toward inattentive partners. If the partner does not respond, they repeat the gesture (Campion et al, 2011; Hobaiter and Byrne, 2011; Larson et al., 2011; McCarthy et al., 2011). Therefore, there is an abundance of evidence that both signing and wild chimpanzees understand the give-and-take of a conversation and adjust their communication to the attentional state of the individual they want to communicate with. This demonstrates visual perspective-taking and mental state modeling.

12. Signing chimpanzees also sign amongst themselves and exhibit a telltale sign of volitional use of language, that is, private signing or signing to themselves, also known as private speech. These examples show that chimpanzee sign language use is not a simple response to prompting by humans and is similar to the way human children develop language. Furthermore, signing chimpanzees spontaneously use ASL to communicate with each other (Fouts et al., 1989; Jaffe et al., 2002). For instance, Loulis (a male chimpanzee) was not raised with humans and was not taught ASL by humans. Nor did humans use ASL in his presence. But he was the adopted son of another signing chimpanzee, Washoe. Loulis acquired his signs from Washoe and the other signing chimpanzees. He was the first non-human to learn a human language from other non-humans. Thus, Loulis observed the other chimpanzees using the signs of ASL around him, like CHASE and TICKLE during play interactions. Moreover, Washoe would mold his hand into signs like MORE for more food. Loulis learned to use many signs in different categories (names, pronouns, verbs, etc.) as a direct consequence of social learning and being taught by his mother's intentional and goal-directed shaping of his abilities (Fouts et al., 1989). Washoe's behavior toward her adopted son demonstrates perspective-taking and empathy (Fouts et al., 1989).

13. Human children from ages 2-7 years engage in private speech, i.e. talking to themselves (and it starts to trail off by late elementary school years). There is much evidence to support the argument that private speech has many functions and is a part of normal development of communication, self-guidance, self-regulation of behavior, planning, pacing, and monitoring skills (Furrow, 1984; Vygotsky, 1962). Private speech helps children to control and regulate their emotions and thoughts by focusing them on their own concerns and providing a buffer from external distractions. Private signing by signing chimpanzees has been well-documented (Bodamer et al., 1994; Fouts et al., 1984) and my colleagues and I have shown that there are numerous similarities to private speech in human children and chimpanzees (Bodamer et al., 1994). Chimpanzee private signing can be placed into the same functional categories as that of human children, and, just as with children, a few categories account for the majority of the utterances. In our studies we found that, just as in human children, a high percentage of the private utterances referred to objects present in the environment (Bodamer et al., 1994).

14. Human children also use private speech during creative and imaginative play. For instance, children often talk to themselves when playing imaginative and pretend games. Private speech is related to more creative play - the more frequently children engage in private speech, the more creative, flexible, and original thought they display (Winsler, 2009). We have found that chimpanzees engage in imaginary private signing as well. Chimpanzees create word-play, or transform a sign or its referent to a different meaning, whether it is present or not. An example is placing a wooden block on one's head and referring to it, in sign, as a "hat" (Bodamer et al., 1994; Jensvold and Fouts, 1993). This is, by far, not the only form of imaginative play chimpanzees engage in.

15. Imagination is a key component of mental representation (the ability to represent an object or concept in one's mind), metacognition (the ability to reflect upon one's own thoughts) and the ability to mentally create other realities. There are several reports of imaginary play in captive chimpanzees (Bodamer et al., 1994; Fouts et al., 1991; Gardner and Gardner, 1969; Hayes, 1952; Jensvold and Fouts, 1993), a captive bonobo (Savage-Rumbaugh and McDonald, 1988), and wild chimpanzees (Goodall, 1986; Hayaki, 1985). Goodall (1986) reported that a 4-year-old wild chimpanzee, Wanda, had been watching her mother, who was perched on a branch above a termite hill, dip a stick into the insects' hole and pull it out loaded with termites. Wanda then picked up a small twig, perched herself on a sapling branch, and poked her stick in a downward direction. A similar instance of imaginary play is very common in human children using cups, saucers, pots, and toy stoves to pretend to prepare and serve a meal as they see their parents do. In these instances a child uses adult tools to go through the motions of a common adult activity, be it children using pots for cooking or chimpanzees using twigs for dipping; these are analogous behaviors. My colleagues and I studied imaginary play in five signing chimpanzees and found strong parallels with that of 2-6 year old human children (Matthews, 1977) including the categories of Animation and Substitution (Jensvold and Fouts, 1993). Animation is pretending that an inanimate object is alive, e.g., talking to a teddy bear, and substitution is pretending an object has a new identity, e.g., placing a block on the head as a hat (Jensvold and Fouts, 1993). Altogether chimpanzees have demonstrated all six different categories of imaginary play found in human children.

16. A very similar behavior to imaginary play is deception; both require behaviors directed toward something that is not there and often involve modeling mental states. There are many instances of deception reported in chimpanzees (Goodall, 1986; de Waal, 2005; Melis et

al., 2006; Whiten & Byrne, 1988). Since this is a common behavior and so closely related to imaginary play, it should not be surprising that chimpanzees have been observed in imaginary play.

17. Finally, in addition to imagination, chimpanzees have a sense of humor and are known to laugh under many of the same circumstances humans laugh, e.g., signing a "joke" or funny statement, during play, when tickled, etc. (Davila-Ross, 2009; Hedden et al., 2005). Altogether these findings provide further evidence for cognitive similarities between humans and chimpanzees in the domains of mental representation, intentionality, imagination, and mental state modeling—all fundamental components of autonomy.

Mary Lee Jensvold

Sworn to before me
this ____ day of November, 2013

Notary Public

STATE OF Washington)
COUNTY OF Kittitas) ss:

On the 21st day of November in the year 2013 before me, the undersigned, a notary public in and for said state, personally appeared Mary Lee Insold, personally known to me or proved to me on the basis of satisfactory evidence to be the individual whose name is subscribed to the within instrument and acknowledged to me that he/she executed the same in his/her capacity, and that by his/her signature on the instrument, the individual, or the person upon behalf of which the individual(s) acted, executed the instrument, and that such individual made such appearance before me the undersigned in the County of Kittitas and the State of Washington

Dissertation: Cross-fostered Chimpanzee Responses to Questions
M.S., Experimental Psychology, 1989, Central Washington University, Ellensburg, WA
Thesis: Imaginary Play in Chimpanzees
B.A., Major: Psychology Minor: Anthropology, 1985, University of Oregon, Eugene, OR

PROFESSIONAL EXPERIENCE

Associate Professor 2011-present/Assistant Professor 2008-present.
Department of Anthropology and Museum Studies, Central Washington University,
Ellensburg, WA.

Director 2011-2013/Associate Director 2008-2011/Assistant Director 2000-2008.
Chimpanzee & Human Communication Institute, Central Washington University,
Ellensburg, WA.

Director 2006-2010.
Bridges to Baccalaureate: YVCC to CWU Program.

Adjunct Faculty/Research Associate/Lecturer 1993-2008.
Primate Behavior and Ecology Program, Anthropology & Psychology Departments, Central
Washington University, Ellensburg, WA.

Chimpanzee Behavior Consultant 1998.
Fauna Foundation, Chambly, Quebec, Canada.

Coordinator/Principal Investigator 1996-2006.
Caring for Chimpanzees Earthwatch Program, Chimpanzee & Human Communication
Institute, Central Washington University, Ellensburg, WA.

Coordinator 1995-2011.
Summer Apprentice Program, Chimpanzee & Human Communication Institute, Ellensburg,
WA.
Coordinate all aspects of the summer program.

Instructor 1993-1997.
Senior Ventures, Central Washington University, Ellensburg, WA.
Instruct summer classes at the Chimpanzee & Human Communication Institute.

Instructor 1992-1996.
Elder Hostel, Central Washington University, Ellensburg, WA.

Instruct 1- and 2-week course at the Chimpanzee & Human Communication Institute.

Instructor 1992.

Extended University Program, Central Washington University, Ellensburg, WA.
Instruct Psychology of Adolescence at YVCC .

Animal Technician I 1992-2000.

Chimpanzee & Human Communication Institute, Ellensburg, WA.
Responsible for daily care of chimpanzees, training student interns, operating hydraulics doors.

Graduate Teaching Assistant 1990-1991.

Department of Psychology, University of Nevada, Reno, NV.
Instruct statistics and research methods laboratory.

Research Assistant 1990-1991.

Sign Language Studies of Chimpanzees, University of Nevada, Reno, NV.
Laboratory assistant in research on development of cross-fostered chimpanzees.

Biological Technician 1989-1992.

U.S. Forest Service, Cle Elum, WA.
Spotted owl field surveys.

Research Assistant 1986-1992.

Chimpanzee & Human Communication Institute, Ellensburg, WA.
Care for chimpanzees and research assistant with signing chimpanzees.

Graduate Teaching Assistant 1986-1989.

Department of Psychology, Central Washington University, Ellensburg, WA.
Assist with PSY 101 class.

- Abshire (Jensvold), M.L. (1989, April). New directions in chimpanzee sign language research. Symposium conducted at the Western Psychological Association, Reno, NV.

INVITED ADDRESS

- Jensvold, M.L. (2012, September). Experimental Conversations: Sign Language Studies with Chimpanzees. Plenary Speaker at From Grooming to Speaking: Recent trends in Social Primatology and Human Ethology. Centre for Philosophy of Science of the University of Lisbon. International Colloquium September 10-12, 2012.
- Jensvold, M.L. (2011, April). Keynote Address: The Ethological Roots of Language Acquisition. Washington Association of Foreign Language Teachers. Ellensburg, WA.
- Jensvold, M.L. (2011, April). Drawings, Imaginary Play, and Private Signing in Chimpanzees. Central Washington University, Primate Awareness Week.
- Jensvold, M.L. (2010, September). Conversations With Chimpanzees: Transforming our View of Nature. Florida Gulf Coast University, Ft. Myers.
- Jensvold, M.L. (2010, April). Improving Captive Care: Taking Them on Their Own Terms. Primate Awareness Week. Central Washington University, Ellensburg, WA.

- Jensvold, M.L. (2010, April). Interactive Use of Sign Language by Cross-Fostered Chimpanzees. Symposium on Sign Language Studies of Cross-Fostered Chimpanzee: Ongoing Inquiry. University of Nevada-Reno, NV.
- Jensvold, M.L. (2010, February). Conversations with Chimpanzees: Only in Ellensburg. Ellensburg Rotary Club, Ellensburg, WA.
- Jensvold, M.L. (2008, November). Conversations with Chimpanzees: Transforming our View of Nature. St. Johns Episcopal Church, Tallahassee, FL.
- Jensvold, M.L. (2007, April). Caring for chimpanzees on their own terms: Research with signing and zoo chimpanzees. University of West Florida, Pensacola.
- Jensvold, M.L. (2003, March). Chimpanzees and sign language. Oakland Zoo, Oakland, CA.
- Jensvold, M.L. (2003, March). The roots of early language development. Head Start/ECEAP Child Development/Mental Health/Family Support Interdisciplinary Conference, Central Washington University, Ellensburg, WA
- Jensvold, M.L. (2001, May). Caring for chimpanzees. Wenatchee Valley Community College, Wenatchee, WA.
- Jensvold, M.L.A. (1999, April). Aspects of signing in chimpanzees: Studies inspired by Beatrix Gardner. Invited address at the Rocky Mountain Psychological Association, Ft. Collins, CO.

GRANTWRITING AND EXTRAMURAL FUNDING DEVELOPMENT

2013. Bohnett Foundation, Chimpanzee Caregiver. \$30,000. Funded.
2013. Promoting 2013 Chimposium. City of Ellensburg. Funded.
2013. Promoting 2013 Chimposiums. Kittitas County. \$2,000. Funded
2012. NEAVES. Operational support. To Friends of Washoe. \$5,000.
2012. Winley Foundation/Friends of Washoe. Chimpanzee Caregiver. \$45,000. Funded.
2012. National Endowment of the Humanities. CWU/CHCI Archiving Project. \$32,000. Pending.
2012. Promoting 2012 Chimposiums. City of Ellensburg. \$8,463. Funded.
2012. Promoting 2012 Chimposiums. Kittitas County. \$2,000. Funded.
2012. Chimpanzee Caregiver Fall 2012 Graduate Assistant. Friends of Washoe \$3,277. Funded.
2012. Chimpanzee Caregiver Maternity Relief Request, Friends of Washoe \$3,232. Funded.
2012. Chimpanzee Caregiver Request, Friends of Washoe (Bohnett), \$43,780.
2011. City of Ellensburg Lodging Tax, Chimposium Advertising, \$7,543. Funded.
2011. Kittitas County Lodging Tax, Chimposium Advertising. \$2,000. Funded.
2011. Lounsbury Foundation. Data Inventory, Preservation, and Access Project. \$60,022. Funded.
2011. Friends of Washoe. Full-Time Chimpanzee Caregiver. \$30,000. Funded.
2010. Hugh & Jane Ferguson Foundation, Outreach Coordinator to FOW, \$7,500, Funded.
2010. CWU College of the Sciences Faculty Summer Research Grant. \$3,000, Funded.
2010. Friends of Washoe. Half-time Position Chimpanzee Caregiver, \$17,000, Funded.
2010. Friends of Washoe. Full-Time Chimpanzee Caregiver, \$35,000, Funded.
2010. Lush, amount unspecified. Pending.
2010. The Brinson Foundation. Chimposium Improvement Project, \$5,000. Rejected.
- 2006-09. Bridges to Baccalaureate, National Institute of Health, Director, \$253,631, Funded.

2009. CWU Technology Grant. Rejected.
2009. Len-Thayer, Central Washington University, Partial funding for caregiver position, \$5000. Rejected.
2009. Co-PI with Lori Sheeran. SOAR, CWU. Rejected.
2008. Visitor Effect in Zoo-Living Chimpanzees. Animal Refinement Award, Animal Welfare Institute, PI, \$10,000, Funded.
2006. Caregiver Interactions with Chimpanzees, Animal Welfare Institute Refinement Award. PI \$6,000, Funded.
2006. Caring for Chimpanzees. Earthwatch. Co-PI. \$13,410, Funded.
2005. Caring for Chimpanzees. Earthwatch. Co-PI. \$87,990, Funded.
2005. Central Washington University Research Equipment Grant. \$3,310, Funded.
2005. Laughter in Chimpanzees (Pan troglodytes) Function and Evolutionary Significance. Central Washington University Faculty Seed Grant, Co-PI, \$1,935, Funded.
2005. Interdisciplinary Continuity of the Arts & Sciences, Co-PI, 68,564, Rejected.
2004. Caring for Chimpanzees. Earthwatch. Co-PI. \$50,075, Funded.
2004. Conversational Responses of Chimpanzees, American Association of University Women, PI, \$30,000, Rejected.
2004. Conversational Competence in Signing Chimpanzees, NSF, PI, \$188,410, Rejected.
2003. Caring for Chimpanzees. Earthwatch. Co-PI. \$71,400, Funded.
2002. Caring for Chimpanzees Earthwatch, Co-PI, \$91,200, Funded.
2002 Len Thayer Small Grant, "Workshop on Humane Techniques in Caring for Chimpanzees". \$2,000, Rejected.
2002. AALAS Foundation, "Workshop in Enriching Care for Chimpanzees". \$7,965.00, Rejected.
2001. Caring for Chimpanzees. Earthwatch. Co-PI. \$97,200, Funded.
2001. Lounsbury Foundation, \$40,000, Funded.
2000. Caring for Chimpanzees. Earthwatch. Co-PI. \$100,800, Funded.
1999. Lounsbury Foundation, \$85,000, Funded.
1999. Caring for Chimpanzees. Earthwatch, Co-PI. \$91,200, Funded.
1998. Caring for Chimpanzees. Earthwatch. Co-PI. \$96,000, Funded.
1998. Central Washington University Foundation Grant. \$2,500, Funded.
1996. Liasoned with a private donor. \$25,000, Funded.
1993. Anonymous private matching grant. \$3,000, Funded.
1993. Proctor & Gamble matching grant. \$9,000, Funded.

PROFESSIONAL SERVICE

- 2008-2010 Faculty Affiliate, Museum of Culture & Environment, Central Washington University. Ellensburg, WA
2007-present. Member, Board of Directors, Animal Welfare Institute, Washington, DC.
2007. McNair, Advisory Board, Central Washington University, Ellensburg, WA.
2007. Chairperson, Chimpanzee Care Committee, Chimpanzee Sanctuary Northwest, Cle Elum, WA
2003-2007. Member, Board of Directors, Chimpanzee Sanctuary Northwest, Cle Elum, WA
1999-present. Member, Advisory Board, Fauna Foundation, Chambly, Quebec, Canada
1999-present. Member, Board of Directors, Friends of Washoe, Ellensburg, WA
1997-2000. Member, Scientific Advisory Board, National Chimpanzee Sanctuary

COMMUNITY SERVICE

- 2008-2009 4H Leader, Kittitas County Extension, Ellensburg, WA
2005-2006. Member, Board of Directors, Friends of the Roslyn Library, Roslyn, WA
2003-2005 Member, Roslyn Historic and Preservation Commission, Roslyn, WA

- 2005-2008 Speaker, Expanding Your Horizons. A hands-on exploration of careers for women in math, science, and technology for 5th through 9th grade girls.
Periodically Speaker, Roslyn Library Armchair Traveler Speaker Series.

PROFESSIONAL MEMBERSHIP
